NSS APPROVED BY STATE OF OREGON
AS FIELD EVALUATION FIRM

July 1, 2008

We are pleased to announce that effective May 29, 2008 NSS is a State of Oregon Approved Field Evaluation Firm. NSS is now an accredited laboratory and as such is approved to evaluate and label machinery and certain components. As part of this accreditation process NSS procedures and Quality Assurance Program has undergone a rigorous examination by the State of Oregon Electrical Inspection Authority.

NSS will start Field Labeling machinery and components for our clients beginning July 1, 2008. Additionally as a part of this program NSS intends to begin a component testing program. This program will include options for component testing and certifications and component labeling with a follow up and surveillance program.

At NSS we are committed to providing our clients with the highest level of service at a competitive price. We believe that our approval from the State of Oregon and our expansion of services will allow us to provide better service to our clients and at the same time realize a cost savings for some of our testing services.

If you have any questions about our recent accreditation or our expanded services please do not hesitate to contact us at any time.
